

NATURALLY BETTER

At **Mandarin Oriental, Bodrum**, sustainability is at the heart of our operations. Our approach is rooted in a deep commitment to reducing environmental impact, fostering collaborations for a sustainable future, and continuously improving our practices to align with global standards.

By implementing forward-thinking strategies and honoring the natural beauty that surrounds us, we aim to lead by example in responsible hospitality.

We have reduced our single-use plastic consumption by 99% across guest rooms, the spa, restaurants and public areas.

We collaborate with non-governmental organizations to help shape a more sustainable future.

We monitor our carbon footprint annually, with a continuous goal of reducing it.

We organize at least five environmental initiatives and activities each year.

We have an internationally recognized GSTC (Global Tourism Sustainable Certificate), LEED Gold Certificate, Forbes Travel Guide Verified Responsible Hospitality Award, Green Key Award, Blue Flag Award, and Green Check Gold Certificate.

We work with sustainable and fair-trade suppliers for cocoa, coffee, egg, seafood, sugra, tea, vanilla and paper.

We use eco-labeled chemicals with automatic dosing systems.

We respect and protect the natural habitats of living beings.

The showers are adjusted to optimize the water flow not to exceed 9 liters per minute.

We support preserving local and global biodiversity.

We preserve local water resources by using a seawater-based re-osmosis system.

We prefer electric all-wheel-drive system cars for our guests' transportation in addition to the resort's existing electric buggies.
