

PRESSURE ACCUMULATOR WITH METAL BELLOWS

Reliability that withstands any pressure

Comfort and dynamics combined with lasting reliability – that's what Witzenmann pressure accumulators offer in modern chassis systems.

Durable

The metal bellows accumulator guarantees lifetime leaktightness – even with changing pressure and temperature cycles – as an alternative to existing solutions.

Maintenance-free

No leakage, no replacement and compliance with the highest quality standards such as IATF 16949 and ISO 9001.

Compact and individually designed

We design our pressure accumulators with metal bellows specifically to meet your requirements in terms of installation space, service life, operating loads and connection geometry, ensuring seamless integration into your system.

Solutions you can rely on

More than 1 million series parts delivered speak for themselves: Witzenmann impresses with precision, vertical range of manufacture and consistent quality. Whether small series or large volumes – Witzenmann delivers the right solution.
