

STORAGE TANKS

A little Space for efficiency.

Maximum efficiency and minimum space: our flexible winding concept allows for customized solutions that adapt perfectly to your requirements, both in terms of design and the required heat transfer.

Flexible winding concept

Adaptation of diameter, height and heat transfer to the respective application.

More efficient heat transfer

Up to 50 % higher exchanger performance thanks to the use of metal hoses instead of smooth stainless steel tubes.

Compact design

Also ideal for tight installation situations.

Everything from a single source. Everything for your success.

As a full-service provider, we support you in every phase of the project. From the initial concept development to the ready-to-use product, from the first samples to series production.

Consulting & planning:

Analysis of your requirements and creation of a customized concept.

Development:

Production of customized modules, adapted to your technical and spatial requirements.

Series production:

Delivery of ready-to-use and optimized modules for long-term use.
