

LED Linear Strips

CCT SELECTABLE

CCT Selectable Linear Strip for Commercial Applications

LED Linear Strip Luminaires are one of Topaz's most adaptable products, finding their way into healthcare facilities, offices and retail applications to name just a few. Adding to their versatility, our CCT Selectable models allow the choice of 3 color temperatures to be selected upon installation, matching a variety of environments or applications. Motion sensor models come pre-programmed and will be suitable for most environments but can be adjusted to cover various scenarios. Emergency battery backup models are also available and provide up to 90 minutes of illumination in the event of a power outage.

FEATURES

- 3 CCT Selectable switch: 3500K, 4000K, 5000K
- Models include (2) ½" knockouts on each side panel
- Designed for surface mount with available J-box cover plate
- End to end mounting and suspension mount options sold separately
- Press to release buttons allow for quick tool-less access to the wiring compartment
- Suitable for mounting up to 15-feet
- Emergency battery backup and motion sensor models available

SUGGESTED APPLICATIONS

- Ideal for use in new construction or remodeling of commercial facilities.
- Offices, healthcare facilities, institutions, and retail
- Suitable for use in closets, compliant with NFPA 70, NEC section 410.16 (A)(3) and 410.16 (C)(5)

LED Linear Strips CCT SELECTABLE

GENERAL SPECIFICATIONS

Input Voltage, Frequency: 120-277V, 50/60Hz
Power Factor, THD %: <0.9, >20%
Dimmable: 0-10V¹
Surge Protection Rating: 4kV
Efficacy: Up to 140 LPW
CRI: 80
SDCM: <6
Functional Life (L70): 50,000 hours

Location Rating: Damp
Ambient Operating Temperature: -4°F to 104°F
Mounting Options: Surface mount ready;
 End-to-end mounting and suspension mount options sold separately
Quick connectors, mounting hardware and 8-inch steel safety cable included

NOTES:

¹ Motion Sensor models are not dimmable via 0-10, it can be set to auto dim via motion sensor. Dimming with standard 0-10V control system or wall dimmers such as Leviton IP710, DS710 or Lutron DVSTV. Dimming complies with IEC60929 Annex E. Fixture may not be compatible with all dimmers. Visit www.topaz-usa.com for up-to-date dimmer compatibility information.

² Lumens at 4000K

Specifications subject to change without prior notice.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WARNING: Some products included in this specification sheet may be subject to the warning requirements of California's Proposition 65. Please refer to your product packaging for more information.

LED Linear Strips CCT SELECTABLE

MOTION SENSOR PRE-PROGRAMMED SETTINGS

Detection Area	Hold Time	Daylight Threshold	Stand-by Period	Stand-by Dimming Level	Mode Selection
100%	5 Minutes	Disable	0 Second	10%	On

<input checked="" type="radio"/>	100%
<input type="radio"/>	50%

Detection area

In this area, movement will be detected and able to trigger the sensor. 100% detection area is also known as the strong sensitivity.

<input checked="" type="radio"/>	<input checked="" type="radio"/>	30s
<input checked="" type="radio"/>	<input type="radio"/>	1min
<input type="radio"/>	<input checked="" type="radio"/>	2min
<input type="radio"/>	<input type="radio"/>	5min

Hold-time

The period of light keeping 100% brightness after moving objects leave the detection area.

<input checked="" type="radio"/>	Disable
<input type="radio"/>	50lux

Daylight threshold

Definition of the ambient brightness; only when the ambient brightness is lower than the preset specific lux amount, the sensor will work; when it's preset as "disable", the sensor works everytime it detects motion regardless the ambient brightness.

<input checked="" type="radio"/>	<input checked="" type="radio"/>	0s
<input checked="" type="radio"/>	<input type="radio"/>	1min
<input type="radio"/>	<input checked="" type="radio"/>	5min
<input type="radio"/>	<input type="radio"/>	+ ∞

Stand-by period

The period of light keeping low output before it's completely switched off. When it's preset as "∞", the light always keep at low output if no movement in the detection area and doesn't turn off.

<input checked="" type="radio"/>	10%
<input type="radio"/>	30%

Stand-by dimming level

The definition of low output in the standby period.

<input checked="" type="radio"/>	ON
<input type="radio"/>	OFF

Mode selection

Sensor mode on when the DIP switch is up; sensor mode off when the DIP switch is down.
