LED Plug-In

2-Pin Ballast Compatibility Guide

**Current**
| | Compatible | | Not Applicable |

IMPORTANT NOTICE: This list is based in part on information provided by the ballast supplier, and testing was done on a stable AC power supply under laboratory, which may not be representative of your particular end-use conditions. While each ballast type listed has undergone testing, some have undergone revisions that may change operating parameters and impact lamp performance. Applications and conditions of use are many and varied and beyond Current's control, so purchasers and users should make their own determinations as to the suitability of a lamp-ballast combination for their own particular application and use. Compatibility may also extend to ballasts beyond this list, so performing an on-site test before installation is recommended.

5W GX23 LED Plug-in Ballast Compatibility

Brand	Ballast	One Lamp	
		120V	277V
ADVANCE	H–1B13–TP–W*	Compatible
