

AN ALL-INCLUSIVE SOLUTION

FOR ALL
YOUR
INDUSTRIAL
CHALLENGES

#LegrandImprovingLives

DUSTRIAL

When it comes to choosing reliable electrical devices for your tough industrial jobs, you can go all in with Legrand, thanks to a rugged, robust product line that keeps on growing.

Whether your installation takes you to corrosive

Provide more protection from more elements in more environments

Our expanded Rubber & Watertight product line means you can spec or install more ruggedly reliable plugs, connectors and receptacles in more places than ever. Available in Straight Blade and Turnlok® configurations, all of our NEMA and non-NEMA devices are built for long-lasting performance both indoors and out. Product features include:

- Thermoplastic elastomer construction withstands impact, chemicals, heat and corrosive conditions
- Terminal screws are backed-out and ready to wire, increasing productivity
- Quick-drive assembly screws allow for fast installation, saving time and money
- Large ribs on body for a superior grip

Manufacturing plant floors may not be pretty, but they've got to be productive. That's where our rugged workhorses come in. All of our industrial-grade solutions deliver industrial-strength electrical safety and reliability. That translates into maximum up time. All the time.

BOXES

With their constant exposure to the elements, shipyards, docks and ports aren't only tough places to work, but tough on the electrical devices that help keep things moving. Not surprisingly, our industrial-strength solutions are designed to hold their own in any marine-based environment, doing their part to keep people and products safe.

Reliable workhorses for harsh and hazardous terrain

As the creator of the first GFCI receptacle, we know electrical safety. And that's a valuable trait when you're a leading global manufacturer of electrical solutions for petrochemical producers. From temporary power to ground fault protection to high-amperage connectors, we offer everything you need to ensure electrical safety in volatile environments.

WIRE MESH GRIPS

Aboveground and underground mines are some of

They say electricity and water don't mix, but in wastewater treatment facilities, it's essential. In fact, a reliable source of power isn't just important for workers, but for everyone in the community. We're proud that many of our electrical solutions are used to ensure the reliable flow of electrical power — and clean water.

Make every connection count

When it comes to temporary power applications, every connection must count. From outdoor special events to busy construction sites, you need electrical solutions that help you power up and connect without disruptions. Our suite of temporary power solutions will help keep your power operations running smoothly.

For additional technical or application-specific information, call 800-223-4185 or visit our website at www.legrand.us/PassandSeymour. We're eager to put our expertise to work for you.
