L﹂ **legrand**®

Power galore without a single outlet in sight

Make dark spaces shine. Relocate outlets to suit your workflow needs. Add lights, speakers, USB charging and portable device docks to build your dream kitchen. The Legrand® adorne® Under-Cabinet Lighting System is a fully customizable, modular solution for eliminating kitchen clutter. Because it's modular, it's compatible with any kitchen layout and can be hard-wired or plugged into any home wiring configuration. While the adorne Under-Cabinet Lighting System was designed with kitchens in mind, it can also be used in offices, hospitality and healthcare applications. Best of all, once it's installed, you'll never know it's there and you'll wonder how you survived without it.

Under-Cabinet Lighting System installed in a kitchen.

FEATURES & BENEFITS

- **Modular Track available in four lengths.** The backbone of the system provides convenient and relocatable access for power outlets, LED lighting, USB charging and digital music and it all tucks away out of sight under any size cabinet. Fits any size cabinet width from 12" up. Track snaps together for easy installation and wiring.

- **Removable Modules.** Snap-in modules are interchangeable, so access to power or USB charging is as easy as swapping modules. Modules can also be relocated or changed out as workflow or power needs change.

- **Hardwire or plug-in installation.** Easy installation to any existing residential wiring system, or simply plug-in to an existing outlet. Hardwired installation can be backfed or surface mounted with multiple 1- or 2-gang control boxes.

- **Neutral colors to complement any kitchen decor.** *NEW!* Available in titanium or white finishes.

- **Simple to install LED lighting.** *NEW!* Available in both linear and expandable slimline styles. Each LED lighting component has a correlated color temperature in the 3000K bin, and a color rendering index of over 90 to illuminate areas with warm inviting color.

- **Digital Music Kit.** Provides high-performance full, rich stereo sound with DSP (Digital Signal Processing). Bluetooth® enabled wireless speakers provide easy pairing and access to digital music libraries while USB charging keeps the music playing.

- **cETLus Listed.**

1. **Plan Your System Layout –** First, determine where you want to install the system. Then measure your cabinets to determine the length of Modular Track required. Modular Track is available in three lengths and an optional Corner Connector is also available.

Modular Track

Corner Connector

2. **Choose Control Box & Power Options –** Next, select the type of lighting and power connection you'd like to include. For a simple install, the Plug-In Control Box provides the easiest solution. For a hardwired installation, there are five options to choose from which enable expanded lighting control options such as dimming.

Hardwired Control Box

Plug-In Control Box

3. **Add LED lights –** The adorne Under-Cabinet Lighting system is only compatible with adorne LED lights. Both versions have a recommended placement of every 18", but the expandable slimline can give true uninterrupted linear task lighting along your entire countertop.

LED Slimline Light

4. **Select Accessories to Complete the System –** The final step is to select the accessories to perfectly complement your system. adorne offers a range of options, including USB charging ports, mobile and tablet cradles, and a Digital Music Kit. Each of these accessories provides flexibility in that it can be added or removed at any time – simply swap it with an existing outlet or blank module to increase your system capabilities.

Under-Cabinet Lighting System LED Lighting

New Adorne extendable slimline lights provide users with continuous, high quality task lighting on counters that is highly efficient. Just pick the LED driver that matches the length of the cabinet section, and add the appropriate amount of slimline lights. Drivers can be mounted underneath the cabinets, or extender cables can be used to hide the drivers in or above cabinets. Jumper cables are available to bypass obstructions, or to give breaks in the lights to match the user's vision.

Under-Cabinet Lighting System Control Box Ordering Information

| Catalog No./Item	Description/Specifications	Catalog No./Item	Description/Specifications
APCB1TM4 **APCB1W4**	**Control Box with Paddle Dimmer –** Connects to existing in-wall wiring. Fits onto end of Modular Track, adding 5" onto system length. Includes adorne 450W CFL/LED Paddle Dimmer. GFCI protection must be provided at the electrical panel. Available in titanium (APCB1TM4) or white (APCB1W4).	**APCB6TM2** **APCB6W2**	**Control Box with Paddle Dimmer & 15A GFCI –** Connects to existing in-wall wiring. Fits onto end of Modular Track, adding 5.25" onto system length. Includes adorne 450W CFL/LED Paddle Dimmer and 15A Tamper-Resistant GFCI Outlet. Available in titanium (AGFTR2152M4) or white (AGFTR2152W4).
APCB4TM1 **APCB4W1**	**1-GANG CONTROL BOX (No Device) –** Connects to existing in-wall wiring. Fits onto end of Modular Track, adding 5" (127mm) onto system length. Provides space for 1 full size or 2 half size adorne switches. GFCI protection must be provided at the electrical panel. Available in titanium (APCB4TM1) or white (APCB4W1).	**APCB5TM1** **APCB5W1**	**2-GANG CONTROL BOX (No Devices) –** Connects to existing in-wall wiring. Fits onto end of Modular Track, adding 5 1/4" (133mm) onto system length. Provides space for 1 full size or 2 half size adorne switches. GFCI protection must be provided at the electrical panel. Available in titanium (APCB5TM1) or white (APCB5W1).
APDWCTM1 **APDWCW1**	**Direct Wire Connector –** Enables direct wire feed of power from in-wall wiring, eliminating need for a Control Box. Connector is 6" in length. Available in titanium (APDWCTM1) or white (APDWCW1).	**APCB3TM4**	**Plug-In Control Box –** Snaps into any module opening on the track and plugs into an existing outlet to provide system power. Cord length of 11" can easily be shortened to match the distance from outlet to Modular Track. Available in titanium only.

NOTE: As of 2014 edition of the National Electric Code, both AFCI and GFCI will be required at the panel for installation of this system. As local codes vary per jurisdiction, Please check with your local code enforcement official for more information.
