PoleSetter Sales Reps

Installing a standard 3" diameter outdoor lamp post has never been easier thanks to the innovative design of the Pole Setter.

Molded using durable, recyclable, non-conductive plastic. Won't crack or rust. No assembly required.

- **Dramatically reduces installation time and cost.**
  No cement required!
- **Innovative design eliminates all of the annoying problems associated with traditional cement installations, i.e., heavy bag handling, easy access to a water supply, mixing, pouring, bracing, waiting for cement to set up, removing braces and clean up.**
- **The Pole Setter's patented design utilizes many large, multi-directional flat surfaces that will ensure a firm and stable set of the lamp post simply by backfilling the hole with the same soil that had been removed.**
- **Easier to replace damaged pole.**
- **Note: The Pole Setter is designed specifically for use with a standard 3" diameter outdoor lamp post only.**
