Enhanced video surveillance with a cloud-based VSaaS solution

In a world of evolving threats and increasing security demands, traditional on-premises video systems are not the ideal solution for every use case. Organizations today look for agile, future-ready solutions to protect people, property and assets — without being limited by expensive hardware demands. Cloud-based video-surveillance-as-a-service (VSaaS) solutions offer a modern alternative: predictable subscription pricing, always up-to-date software and the flexibility to scale quickly across locations.

Octave's vision for the future of video surveillance

At Octave, we see the cloud as a driving force behind smarter, more connected security. Our Octave Coda Video Cloud (formerly HxGN dC3 Video | Cloud) solution empowers organizations with real-time insights, streamlined operations and reduced IT overhead — all within a secure, compliant framework.
The result? Faster decisions, enhanced situational awareness and greater operational efficiency.

Tailored for today's diverse security needs

Coda Video Cloud is built to serve a wide range of organizations — from small and mid-sized installations needing event-based monitoring to large, distributed video projects requiring seamless multisite oversight. In addition, it's an ideal fit

for businesses embracing a cloud-first strategy. Thanks to its web-based UI it is intuitive and does not require extensive training, yet still meets the high-security demands of sectors like health care, finance, retail, education, corporate campuses and public safety — making it a powerful, future-proof solution for modern security challenges.

Built to scale, designed for agility

Modern, cloud-native microservices architecture enables dynamic scalability for small to mid-sized installations. This eliminates high up-front infrastructure costs associated with on-premises systems.

AI-driven intelligence for proactive security

AI-powered analytics like facial recognition, object tracking and behavior analysis turn video feeds into actionable intelligence, driving faster responses, smarter resource allocation and automated workflows.

Secure, compliant and cost efficient

End-to-end encryption, granular access controls and compliance with global standards ensure high-grade security – ideal for highly regulated industries. Usage-based pricing enables scalability and reduced TCO.

Octave Coda: Build the system that fits

Unlike disjointed security solutions, Octave Coda (formerly HxGN dC3) is a versatile, comprehensive solution portfolio that empowers organizations to assemble tailored solutions that best fit their unique needs. This approach enables them to centralize management, streamline operations and reduce complexity, resulting in a more efficient and effective physical security infrastructure.

Coda also leverages the power of Octave's broader solution portfolio, which includes powerful mapping and visualization capabilities, dispatch and collaboration tools and enterprise asset management solutions.

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property and assets – for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
