

## PRODUCT SHEET

# Octave Forte ReviewWorx

*(formerly CADWorx Design Review Professional)*

Powerful design collaboration

### Key Benefits

- Multiple File Formats with Intelligence
- Dynamic Model Updates
- Realistic Visualizations
- Review Custom Data and Isogen Data
- Measurements with Snapping Options
- Support for Point Cloud Exchange Formats
- Enhanced Clipping Options
- Line Number and XREF View Palettes
- Advanced Model Tree
- Search/Filter by Date
- Markup and Redlining
- Centralized Annotations
- Views and Animations
- Customizing Tool Tips
- Intelligent Publishing
- Batch Export
- Advanced IFC Collaboration

Octave Forte ReviewWorx allows the review and publishing of Forte 3DWorx (formerly CADWorx Plant Professional) models by designers, managers, owners and other stakeholders. Discover how you can improve collaboration by using tools for markups, design comments and redlining.

By using Forte ReviewWorx, users can create realistic visualizations and access intelligent information. Whether it is one model file or multiple model files, the intuitive interface and its performance-based tools make manipulating and moving around even the largest models quick and smooth.

### Quicker review cycles

In Collaborate and review designs more quickly and intuitively with Forte ReviewWorx. By using 3D, users can reduce the need to interpret designs via paper printouts and other non-interactive methods. Forte ReviewWorx improves collaboration with tools for markups, design comments and redlining.

### Stunning performance

The intuitive interface of Forte ReviewWorx and its performance-based design makes manipulating and moving around even the largest models quick and smooth. Ideal for Multi-model Designs, there is no need to manually load the separate model files that make up a design. If files are externally referenced, these are automatically included in the review model.

## Accurate visualization

Powerful visualization tools provide settings for color, transparency, and model shadows. With flexible selection sets, it is also possible to adjust settings, not only for single components, but for xref's, line numbers, etc. – in fact, for any selection set available to the user.

## Intelligent information

Access the same model information as you would within a Forte 3DWorx design session. Component names and descriptions, line numbers, weights and other plant design data are all available.

## Editable animations

Creating informative and stunning animations is simple with Forte ReviewWorx. Users can set out animation paths and edit the path line at any point. The view direction on any point of the animation path can also be edited in a combination of the six degrees of freedom, plus view angle.

## Interactive viewing tools

Explore your 3D models efficiently and informatively with user-friendly volume clipping and 3D cutting planes. Quickly refresh to discover the latest updates from your 3D design environment so that you're always using the most up-to-date information to make decisions.

## Support for BIM

Take advantage of IFC export capability. You can open exported Forte 3DWorx models into a BIM collaboration environment.

## Publishing and collaboration

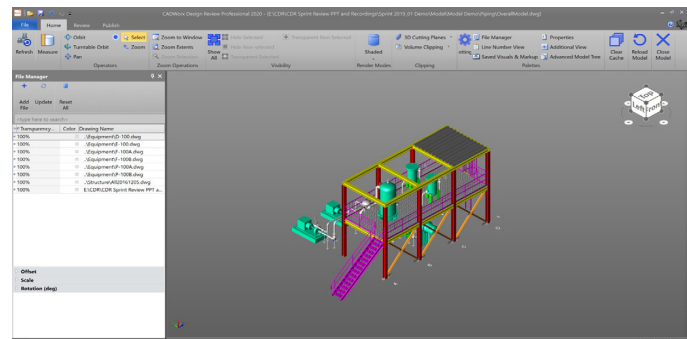

Publish models into various intelligent file formats (IFC, VUE, 3D PDF, CWDR) for collaboration and sharing purposes. Files from multiple project contractors can be brought into the collaboration environment of Forte ReviewWorx to be combined into a single sharable file.

## Technical Specifications

- AutoCAD - compatible
- BricsCAD - compatible (Recommended) Intelligent information

## Application areas

Forte 3DWorx has links to Aspect Pipe Stress (formerly CAESAR II)® And Aspect Pressure Vessel (formerly PV Elite) analysis, allowing reuse of the 3D model components for a time-saving and accuracy improving workflow solution.

Forte ReviewWorx puts the power of design and model review in the hands of all project stakeholders.

## About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets– for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
