About Octave5

About this release

This document describes the enhancements, fixes and system requirements for Octave GeoMedia Map Publisher 2025. This release provides compatibility with GeoMedia Desktop 2025 and other underlying platforms, as well as enhancements and fixes. For information on new features, see [New technology](#). For information on fixes, see [Issues resolved](#). For information on hardware and software requirements, see [System requirements](#). This document is an overview and does not provide all details about the product's capabilities. See [online help](#) and other documents provided with the product for more information.

Octave GeoMedia Map Publisher

Octave GeoMedia Map Publisher (formerly GeoMedia Map Publisher) is a cartographic publishing tool that provides national, regional and military mapping agencies with enhanced cartographic capabilities and high levels of automation for production of their map series products and ad hoc hard copy maps. State departments of transportation (DOTs) can also use GeoMedia Map Publisher to produce their state maps.

New platforms

GeoMedia Desktop

GeoMedia Desktop 2025, Professional tier is required for this release.

Geospatial Licensing

Geospatial Licensing 2025 is required for this release.

New technology

Licensing

A new product license is required for the 2025 release. The latest Geospatial Licensing Administration tool should be downloaded and used for this release.

System requirements

Computer/processor	Any x64-based processor
Memory (RAM)	6 GB or more recommended
Disk space ¹	1 GB for software
Operating systems ²	<ul style="list-style-type: none">• Windows 11• Windows Server 2022• Windows Server 2025
Peripherals	Software licensing requires an ethernet card
Virtual server and virtual app technology	GeoMedia is a standard Windows application that has been shown to be compatible with a variety of virtualization technologies such as VMware, Hyper-V, VirtualBox and XenApp. While running GeoMedia in such environments is supported, any problems that uniquely occur in a virtualized environment are considered issues with the virtualization software.
Prerequisites	<ul style="list-style-type: none">• GeoMedia Desktop 2025, Professional tier• Geospatial Licensing 2025
Database servers ³	<ul style="list-style-type: none">• Oracle Server versions as indicated in the release guide for GeoMedia Desktop• SQL Server versions as indicated in the release guide for GeoMedia Desktop
Database clients	<ul style="list-style-type: none">• Oracle Client versions as indicated in the release guide for GeoMedia Desktop• SQL Server Native Client versions as indicated in the release guide for GeoMedia Desktop

System requirements notes

¹ Disk I/O is usually the slowest task in geospatial data processing. Faster hard disks improve productivity. Reading data from one disk, writing temporary data to a second disk and writing data to a third disk improves performance. Disk arrays improve productivity, but some RAID options slow performance. Network disk drives are subject to network limitations.

² GeoMedia runs on 64-bit systems in 32-bit emulation mode.

³ In all cases of database software, support for a specific version is dropped in the GeoMedia context when the database vendor ends support for that version.

Issues resolved

Support ticket	Description

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property and assets – for any scope, at any scale. For decades, we’ve partnered with customers to sharpen performance, elevate efficiency and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what’s possible from day one onward.
