

SOLUTION SHEET

Octave Tempo Operating Procedures

The most innovative and field proven operational content lifecycle management system

Consistently proven after multiple highly competitive, successful enterprise RFP bids

Authoring technology

- **Authoring and evergreening** time/effort can be reduced up to 95%
- **Standardize work** and enforce best practices across the business
- **Improve readability and consistency** of tasks done by plant operators and administration

Leading technology, mobile ready and future-proof

- **Advanced technology** used by the world's largest tech companies like Google, Amazon, Facebook, IBM and Microsoft
- **Intuitive and easy to use**, with a social media style comment system. Share feedback and impact how procedures are used
- **Perfectly positioned** for simple and quick adoption as well as future integration and scalability

The knowledge foundation for the digital workplace

- **Mobile ready** for the connected worker and workplace
- **Integrated training** for continuity between work instructions and all types of training including VR, AR, microlearning and simulations, etc.
- **Supports future automation** of human activity

Evolving product suite used by global industry leaders

- **Strong innovation** agenda, adding value based on client requests and a growing portfolio of products
- **Product vision** driven by the world's largest and most sophisticated process manufacturing industry leaders

"This innovative content management system will allow us to get our subject matter experts out of the office, away from editing and back to what they want and need to do – which is (to) develop operator capability. The ease of use will ensure accuracy of operating procedures (and other documents), allow real-time verification, provide transparency for updates and move our knowledge management forward by decades. This is real digital innovation for our front-line employees."

Production manager

The knowledge management partner of global industrial manufacturers

"The digital procedure is so much easier to follow. It's clear and laid out perfectly. I've attached the muddled procedure we have been following over the years. I am very excited to use Tempo Operating Procedures in the future. I will gladly torch this old paper version!"

Operations team leader

"I provide a garbage can of low-quality content and it comes back a beautiful digital procedure."

HSSE manager

"It's about time we moved into the modern world, the old system was archaic."

Front line operator

Solving the toughest knowledge management problems in high-consequence operations

Industrial and manufacturing organizations must avoid major incidents that impact production, the environment and the health and safety of workers. Our solution is providing a software that empowers workers and brings factories into a digital knowledge ecosystem.

Tempo Operating Procedures (formerly AcceleratorKMS) equips workers with accurate and timely information like procedures and best practices. At the point of need and in the flow of work, organizations can drive operational excellence, global standardization and better compliance management with this solution.

A proven fit in Fortune 500 digital transformations

Did you know? Tempo Operating Procedures has been adopted by more than 200 industrial facilities globally. Our clients include the largest vertically integrated energy businesses, the largest industrial agriculture business and the world's largest chemical manufacturers.

Tempo Operating Procedures prevents environmental impacts, rises in insurance premiums, lost time and revenue and equipment failure. All these issues can critically impact the business after only one incident. Tempo Operating Procedures ensures tasks are done right the first time, to protect your organization from information-caused incidents.

Practical solutions to complex problems

Tempo Operating Procedures combines a connected worker platform, component content management system and learner experience platform into a single application that workers in the field can use on the go. Tempo Operating Procedures can make your organization safer and more productive. It's the ability to signal, "my task is complete, yours can start."

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
