

PRODUCT SHEET

Octave InConcert

Excellence in engineering and operations
for EPCs and owner operators

Key business advantages

Increased operational efficiency

Improved engineering

Design quality

Safety enhancement

Cost and schedule optimization

Maintenance cost reduction

Automation and data-driven productivity

Revolutionizing engineering information visibility and insights across the asset lifecycle

Experience a transformative journey with Octave InConcert (formerly HxGN SDx2), Octave's latest offering for Engineering Information Management. In today's dynamic digital landscape, success relies on comprehensive visibility and performance insights spanning the entire asset lifecycle. InConcert epitomizes Octave's expertise and innovation, reshaping how organizations manage digital projects and assets and improving business value.

InConcert introduces advanced capabilities tailored to modern industries' evolving needs. More than just another software solution, InConcert represents a significant leap forward, empowering organizations to achieve operational excellence.

At Octave, we recognize the pivotal role of digital transformation in modern business. InConcert is crafted to facilitate this transformation by providing holistic visibility and performance insights throughout the asset lifecycle. Easily connect data consumers throughout your organization to on-demand information that reduces search time and increases decision velocity. By leveraging innovations, such as artificial intelligence (AI) and machine learning (ML), InConcert also unlocks unprecedented levels of efficiency and innovation across all operational facets.

Advancing connectivity and asset management

Connectivity is essential for success in today's dynamic business environment and InConcert stands at the forefront of this transformation. Unprecedented integration lies at the heart of its transformative capabilities, ushering in a new era of data connectivity and interoperability.

InConcert seamlessly bridges the gaps between disparate systems and data sources, facilitating a smooth flow of information across digital assets, business projects and operations. Integration mechanisms ensure the seamless integration of digital twins, leveraging AI/ML to enhance asset documentation and automate data processes.

Advanced integration liberates information, transforming it into a dynamic resource that accelerates operational efficiency and informs decision-making throughout the asset lifecycle. It embodies Octave's holistic philosophy, breaking down barriers, fostering collaboration and empowering organizations to harness the full potential of their data reservoirs.

InConcert offers exciting project capabilities, including side-by-side 2D/3D comparisons, which reduce review cycles and accelerate project execution. Harnessing the power of AI/ML, InConcert streamlines data take-on processes, minimizing manual efforts and enhancing efficiency.

With its 'single pane of glass' approach, InConcert ensures seamless data integration across Octave and third-party solutions, providing a unified view of operations and enhancing collaboration across the ecosystem.

Benefits of integration

- Gain real-time insights and analytics
- Utilize AI/ML for smart data processing
- Continuous sharing of data from Octave design tools
- Effortlessly import third-party 2D/3D models
- Improved compliance and risk management
- Manage asset data seamlessly from conception to decommissioning
- Boost efficiency and slash maintenance costs
- Realize 30%-50% in time savings
- Enhance and prioritize safety
- Drive collaboration and innovation
- Leverage advanced data collection, integration and analysis capabilities
- Access predictive and prescriptive analytics

Choose InConcert to unleash the full potential of your projects and assets...*today and tomorrow!*

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
