6 ways to use Octave InConcert for better industrial outcomes

Say goodbye to data silos preventing collaboration and efficiency with Octave's cloud-native SaaS solution: InConcert (formerly HxGN SDx2). Swap disparate data points for a unified digital thread, which consolidates all your critical information to enhance productivity, safety and operational excellence.

1 Maximize productivity

Accelerate decision-making with real-time insights and up to 50% faster data retrieval.

2 Safeguard sensitive data

Protect against unauthorized access and cyber threats with robust security measures.

3 Elevate collaboration

Align project goals and reduce errors with advanced integration for seamless teamwork.

4 Simplify workflow

Improve visibility and efficiency with a centralized hub for all your asset data.

5 Stay compliant

Maintain operation integrity and meet regulatory requirements with built-in governance features.

6 Flex for the future

Stay one step ahead with a scalable solution that is regularly updated with innovative new features.
