

Connected Rail in action

Station

Provide operational context

Challenge

Security teams need to quickly identify events that require action, and operations teams need to monitor, maintain and service physical assets.

Alto Twin | Coda | Attune

Operations control center

Build a unified operational view

Challenge

Operations teams need a complete view of the transportation network to quickly assess incidents and coordinate response.

Depot

Support maintenance and security

Challenge

Maintenance teams need to prioritize work to minimize disruptions while security systems protect facilities from theft, vandalism and unauthorized access.

Track

Close the loop on incident response

Challenge

Incidents require coordinated action across operations, maintenance and security teams.
