Top 10 reasons to upgrade from MP2 to Octave Attune EAM

For years, you've relied on MP2 to manage your assets, inventory and maintenance operations. But your business has evolved. Rising energy costs, increasing operational demands and growing competition require greater efficiency, better visibility and faster decision making.

You need to streamline operations, gain real-time insight into asset performance and adapt as your business changes. You need to get more value from your assets. Octave Attune EAM (formerly HxGN EAM) helps you do exactly that.

1. Gain powerful features

Expand your asset management programs while maintaining the familiar workflows and experience you've relied on in MP2. Attune EAM includes screens and processes that feel familiar while adding automation and enhanced functionality. Create work orders faster, simplify work order history, generate reports more easily and manage multi-equipment work orders with greater efficiency.

2. Take advantage of breakthrough innovations in technology

Attune EAM includes advanced technology that helps you improve performance today while preparing for tomorrow.

- **Embedded AI assistance** - Accelerate user adoption with a convenient, dependable AI assistant that guides you with prescriptive actions, classifies data and streamlines workflows.
- **Attune EAM Mobile** – Unlock new work processes by providing teams with a powerful mobile enterprise asset management solution that delivers the flexibility of desktop EAM wherever work happens.
- **Visualization Studio** - Gain a single, spatially aware source of truth with support for 2D CAD and 3D digital twins.
- **Activity Disbatch** – Improve planning and scheduling by automatically balancing assets, personnel and materials to focus resources where they deliver the greatest impact.
- **Asset Investment Planning** – Generating data-driven action plans based on condition, performance, risk and funding levels.

3. Adapt the solution to work the way you do

Adapt Attune EAM to the way your teams work. A modern, intuitive interface delivers relevant information across the enterprise, while flexible web and mobile access enables employees to work effectively from smartphones, tablets and desktop devices.

4. Help your employees be more productive

Deliver the right information to the right people through personalized dashboards, inboxes, key performance indicators and enhanced data filters. Built-in analytics help employees make faster, more informed decisions while reducing manual effort.

5. Get timely alerts when there's an asset issue

Continuously monitor asset health and energy usage with real-time data and rules-based analytics. Receive automatic notifications and escalations based on key issues that you define, helping teams respond quickly, reduce downtime and minimize costs.

6. Find ways to save money

Monitor energy consumption to gain insights to reduce capital and operational costs. You'll spot energy waste and take corrective action. Combine energy consumption rates with other asset management metrics to make more informed repair-or-replace decisions.

7. Easily comply with regulatory requirements

Track the environmental impact of your operations. Attune EAM helps simplify energy and carbon reporting requirements while supporting compliance goals and sustainability initiatives.

8. Protect your investment in asset management

Attune EAM is designed to evolve with your business. Support changing operational and technology requirements while minimizing training through familiar technologies and intuitive workflows.

9. Complete the upgrade in very little time

Attune EAM streamlines implementation with a simplified deployment approach. Most users can be trained in two weeks.

10. Gain maximum flexibility to deploy and grow at your own pace

Deploy Attune EAM on your timeline. Add capabilities, including calibration, electronic signatures and facilities and fleet management, as your needs change. Choose the deployment option that fits your business – on premises, in the cloud or hybrid.

Join the Octave family

Attune EAM is part of Octave's strategic software portfolio, connecting asset management with digital projects and digital assets across the operational lifecycle. By bringing these capabilities together, organizations gain greater visibility, stronger collaboration and more informed decisions than with traditional EAM-to-ERP integrations.

Keep the business processes your teams know from MP2 while gaining the flexibility, intelligence and scalability of Attune EAM.

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property and assets – for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
