This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to USD 300 000.

Product description

The planned maintenance system (PMS) software is a computerized tool to centralize maintenance information, schedule, track, and organize maintenance tasks.

Application/Limitation

Any version of this software sold and covered by this type approval must fulfil all functional requirements as specified in Class Programme DNV-CP-0206.

The system shall at least cover all relevant class items.

To obtain the in-operation notation PMS(M) for a specific vessel all relevant requirements of the current set of Rules for Classification (Ships or Offshore) must be met.

HxGN EAM version 12.2.1 was submitted for certification prior to the release of Class Programme CP-0206, published in April 2025. As such, the software is exempt from the requirement regarding export functionality in accordance with the MAD standard, as specified in CP-0206 Section 2.4.5.

Type Approval documentation

System documents

Tests carried out

A software evaluation of HxGN version 12.2.1 has been carried out to verify compliance with the functional requirements as per Class Programme CP-0206 Sec.2 4.

Marking of product

The identification is stated in the programme display and on the printed reports.

Periodical assessment

In order to verify that the conditions for the TA are not altered in the validity period, biennial assessments will be carried out. The assessment consists of a documentation review (see CP-0206 Sec.1 Table 5).

Changes in the type approved software related to the functional requirements given in CP-0206 Sec.2 4 or an upgrade to another major version (semantic versioning) may require a new type approval. The holder of the TAC shall inform the Society about any such changes.

Manufactured by:

Any significant change in the software may render this Certificate invalid.

The validity date relates to the TAC issued to the manufacturer of the software, and not to the approval of the individual Planned Maintenance System installed on each vessel.

The validity status of the certificate can be found at <https://approvalfinder.dnv.com/>.

The digitally signed electronic version of the TAC represents the original of the certificate, and any paper version is a copy.
