Ditch the rest: Discover a complete structural solution

*GT STRUDL is now **Octave Aspect Structure***

No hidden costs

There are no extra modules necessary for Finite Element Analysis, and no need to buy codes separately. Access a complete, streamlined structural design and analysis ecosystem.

New intuitive interface

Explore Aspect Structure's new and improved user interface, built to support both experienced engineers and new users. Benefit from a streamlined, intuitive environment that enhances productivity while making it easier to learn and navigate.

AI and contextual guidance

Save time in your design process with AI-driven inputs that quickly generate your initial model. Receive contextual guidance on best practices and standards to ensure accuracy and efficiency from the start.

Connection to design solutions

Have an existing Octave design or analysis solution? Connect it to Aspect Structure for interoperable workflows at no extra cost. Save time sharing content without data integrity risks or re-work.

No time-consuming customization

Don't waste time configuring workflows or tailoring reports for big projects. Aspect Structure delivers a ready-to-use solution for projects of any scope.
