

Powering the public sector landscape

Modernize operations. Optimize resources. Deliver better outcomes for citizens with data-driven solutions.

Water/Wastewater

CHALLENGES

- Aging assets with limited visibility into condition and risk
- Reactive maintenance cycles driven by failures
- Manual, resource-intensive compliance and reporting

HOW OCTAVE HELPS

- Create a single, trusted view of asset condition and risk
- Prioritize investment based on impact, likelihood and performance
- Streamline regulatory reporting with real-time data

→ Streamline asset performance

Public Transit

CHALLENGES

- Service delays that erode public confidence
- Disconnected fleet, facilities and infrastructure data
- Limited insight into asset performance and reliability

HOW OCTAVE HELPS

- Reduce unplanned downtime through early risk identification
- Unify asset data across fleet, track and operations
- Improve service reliability with consistent, data-driven decisions

→ Get real-time fleet visibility

Public Works

CHALLENGES

- Growing backlog of maintenance and capital work
- Fixed budgets with increasing demand for investment
- Administrators can't see where funding delivers the most impact

HOW OCTAVE HELPS

- Prioritize high-impact work based on risk and criticality
- Align managers, teams and contractors with shared asset intelligence
- Demonstrate clear, defensible use of public funds

→ Better connect communities

Make decisions you can stand behind with data-driven insights

- **Reduce** disruption across essential services
- **Stay secure** and ensure compliance confidence
- **Prioritize** investment based on risk and impact
- **Strengthen** accountability and public trust with clear visibility

→ Let's talk about how you can make data-driven decisions
