A Complete Contract Lifecycle Management Solution

Octave Loop Contracts

Octave Loop Contracts helps organizations reduce risk, enforce compliance and drive contractor performance across every phase of the contract lifecycle.

Built for complex project execution, this fully SaaS, web-based platform supports the entire contract lifecycle—from scope development, sourcing and bid evaluation to change management, compliance tracking, progressing, invoice validation and closeout. Role-based digital workflows connect internal teams and external stakeholders on a unified platform, improving collaboration, minimizing risk exposure and providing clear visibility into obligations, budgets, milestones and performance metrics.

With embedded analytics and seamless integration into broader supply chain and project controls ecosystems, Loop Contracts enables organizations to manage contracts proactively, make informed decisions and achieve successful outcomes on projects of any scale or complexity.

Driving Business Value

Web-based and secure, Loop Contracts addresses the needs of owners, fabricators and EPCs by:

- Enhancing project profitability by improving contract administration efficiency, reducing overhead and eliminating unnecessary rework
- Enabling faster decision-making through real-time visibility into contract status, commitments, amendments and financial impacts
- Increasing competitiveness with accelerated sourcing and award cycles
- Driving contractor engagement with an intuitive, self-service portal, enabling efficient onboarding, document management and communications
- Controlling project risks with structured change management workflows, compliance tracking and claims avoidance
- Supporting global project execution with standardized contract workflows, centralized documentation and actionable performance insights
- Enhancing cashflow by aligning invoicing and payments precisely with contract progress, deliverables and milestone completion
- Ensuring continuous improvement with comprehensive contractor performance analytics to benefit future sourcing and contracting decisions

Contractor Collaboration

Loop Contracts delivers a secure, centralized collaboration portal to simplify subcontractor interactions and ensure alignment throughout the contract lifecycle. Teams can manage onboarding activities, track compliance documentation, exchange critical project communications and maintain ongoing dialogue in a single location—driving clarity, enhancing transparency and reducing administrative overhead from contract initiation to closeout.

Sourcing & Qualification

Loop Contracts streamlines contractor sourcing with collaborative prequalification workflows, centralized documentation and configurable selection criteria. With access to historical performance data and options for project-specific qualification, project teams can efficiently evaluate contractor suitability, accelerating sourcing decisions, improving quality and reducing project risk.

RFP & Bid Management

Loop Contracts digitalizes the RFP process—enabling teams to issue bid packages, manage communications, collect responses and evaluate bids efficiently and transparently. Support for diverse order and subcontract types ensures alignment with project execution strategies, significantly reducing administrative complexity and improving the quality, transparency and speed of bid assessment and award.

Change & Compliance Management

Loop Contracts provides structured workflows for early visibility and effective management of scope changes, claims and compliance deviations. Project teams benefit from transparent, auditable processes ensuring efficient and complete tracking of contract amendments, cost impacts, and performance issues. This structured approach mitigates project cost and schedule risk, enforces compliance standards and enhances contractor accountability throughout the project lifecycle.

Progressing & Invoice Management

Loop Contracts streamlines contract progressing and invoice approval workflows by enabling precise tracking of deliverables, percent complete, and payment milestones against contract-specific terms. Control accounts and detailed cost code management at the line-item level ensure comprehensive financial oversight, improved payment accuracy, reduced administrative burden and stronger cost control across diverse contract types and project phases.

Closeout & Performance Evaluation

Loop Contracts improves the contract closeout process through configurable workflows, checklists and comprehensive documentation tracking, ensuring compliance with all contract obligations.

Integrated performance review workflows support input from multiple stakeholders to capture critical contractor metrics in safety, quality, schedule adherence and cost performance—providing actionable insights to guide future sourcing decisions, drive continuous improvement and elevate overall contractor accountability.

Total project control with Octave Sequence Enterprise

Fully integrated with Loop Contracts, [Octave Sequence Enterprise](#) (formerly EcoSys) is an enterprise project performance platform built for capital-intensive organizations that need more than visibility — they need control.

From portfolio planning to field execution, Sequence Enterprise connects cost, schedule, risk, contracts, resources and performance data in one trusted environment. When paired with Loop Contracts, contract commitments, change management and cost control are seamlessly linked, giving teams complete visibility into contract performance and financial impacts across the full project lifecycle.

Sequence Enterprise also supports embedded document management that brings contracts, RFIs and supporting files into the same environment as project performance data. The integrated AI assistant surfaces insight faster and guide users to action. Enhanced mobile capabilities keep field teams connected in real time. And a stronger cloud architecture ensures the platform scales with demand.

Sequence Enterprise has been proven to:

- Drive better decision-making grounded in trusted, connected data
- Increase forecast accuracy and project predictability
- Support more accurate budgeting and capital planning
- Enable proper allocation of resources across portfolios and programs
- Reduce project cost overruns by **up to 20%**
- Increase project controller productivity by up to 25%
- Improve cross-functional collaboration across finance, procurement and operations

Together, **Loop Contracts** and **Sequence Enterprise** deliver a complete, connected solution for managing contracts and project performance, from commitment to closeout.

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property and assets – for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
