

Octave Tempo Operations Management of change overview

Key benefits include:

- Easy to use
- Consistent MOC data
- Safer processing of change requests
- Eliminates paper, spreadsheets and fragmented databases
- Advanced workflow capabilities
- Fast search and filtering
- Integration with other industrial systems
- Real-time MOC monitoring
- Web based access

The challenge

Management of change (MOC) is a best practice for controlling safety, health and environmental risks when changes occur across facilities, documentation, personnel or operations. In many industrial environments, MOC remains managed through a fragmented mix of in-house tools, spreadsheets, documents and disconnected web applications. The result? Gaps in coordination, inconsistent processes and inefficiencies.

Without a unified system, risk increases. Change requests can be mismanaged, creating confusion for teams and potential safety issues on site. These inconsistencies drive unnecessary work (and rework) to ensure changes are understood and executed correctly.

What is needed is a consistent, enterprise-wide approach. One system and one source of truth.

Tempo Operations Management (formerly j5 Management of Change) brings structure to MOC by standardizing how changes are managed and tracked across the plant. It enforces consistent processes, provides full visibility into the changes and ensures every required action is completed on time and without costly oversights.

How Tempo Operations Management delivers the solution

Companies worldwide use Tempo Operations Management to bring clarity and control to MOC. It provides a logical and intuitive way to capture and manage change events to give teams full visibility at every stage.

Built-in templates make it easy to configure different MOC procedures, while a comprehensive starter template (based on the DuPont MOC procedure and includes a seven-gate mechanism with many options) helps teams get up and running quickly.

"I would definitely recommend Tempo Operations Management to my next client."

Saqib Khan
Senior manager, Accenture Singapore

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
