How Octave InConcert can improve your industrial workflow

Transform data management, enhance asset performance and optimize efficiency

Say goodbye to data silos preventing collaboration and efficiency with Octave's cloud-native SaaS solution: InConcert (formerly HxGN SDx). Swap disparate data points for a unified digital thread, which consolidates all your critical information to enhance productivity, safety and operational excellence.

Maximize productivity

Accelerate decision-making with real-time insights and up to 50% faster data retrieval.

Safeguard sensitive data

Protect against unauthorized access and cyber threats with robust security measures.

Elevate collaboration

Align project goals and reduce errors with advanced integration for seamless teamwork.

Simplify workflows

Improve visibility and efficiency with a centralized hub for all your asset data.

Stay compliant

Maintain operation integrity and meet regulatory requirements with built-in governance features.

Flex for the future

Stay one step ahead with a scalable solution that is regularly updated with innovative new features.
