Octave Tempo Work Instructions overview

The challenge

Every day on an industrial site, there is a stream of work instructions issued by planners, maintenance personnel, operations supervisors and controllers at all levels and areas within the process. Unfortunately, there are still inadequate, time-consuming methods such as paper, word processor, spreadsheet and homegrown applications being used to plan and complete these work instructions.

Poor traditional work management methods are not integrated with other software, such as data historians and Computerized Maintenance Management Software (CMMS) systems, resulting in dual capture and information silos. This increases organizational risk and inefficiencies.

Work Instructions (formerly j5 Work Instructions) users have reported the following benefits:

- Easy to use
- Consistent work instructions
- Wide visibility of operations data
- Eliminates paper, spreadsheets and scattered databases
- Saves time and improves accuracy
- Advanced workflow capabilities
- Fast search and filtering
- Integration with other industrial systems
- Ease of monitoring
- Integration with other Tempo Operations Management (formerly j5 Operations Management Solutions) applications

How Tempo Work Instructions provided the solution

To remedy these pains, companies worldwide use Tempo Work Instructions. This allows their operations teams to plan, record, manage, view and complete any work instruction consistently and efficiently with a web browser and mobile device.

"We rely on Tempo Operations Management for logbook, handover, work instructions, standing orders, near misses and mobile inspection rounds. We would like to extend our use of Tempo Operations Management to other applications in the future."

Nobuyuki Takahashi

Executive director, Kainan plant manager, Wakayama Petroleum Refinery

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
