4 reasons to switch to Octave Aspect Pressure Vessel

Octave Aspect Pressure Vessel (formerly PV Elite) has new ways to optimize your engineering workflows. Here are 4 great reasons engineers are already using Aspect Pressure Vessel.

1 Advanced analysis capabilities

- **Nozzle design and analysis:** Robust, advanced nozzle tools
- **Division 1 and 2 capabilities:** Advanced analysis methods
- **Multiple international codes:** ASME, EN 13445 and more
- **Comprehensive reporting:** With equations and substitutions

2 Superior load handling

- **Complex wind and seismic loads:** Global catalog of codes
- **Advanced load combinations:** Optimized and easy to use
- **Factored load integration:** Proper load case handling

3 Integrated workflows (with no hidden costs)

- **Heat exchanger design included:** Competitors charge extra
- **Octave Forte compatibility:** Transfer design data seamlessly
- **Octave Aspect Pipe Stress integration:** Nozzle loads for local stress analysis

4 Proven results

- **Reduce design work by 85%[1]:** Using automated calculations
- **Octave enterprise support vs. limited competitor resources**
- **Future-proof updates:** Continuous code compliance
- **Better documentation:** Professional report exports
