

PRODUCT SHEET

Octave Tempo Operations Management Connector for IBM Maximo®

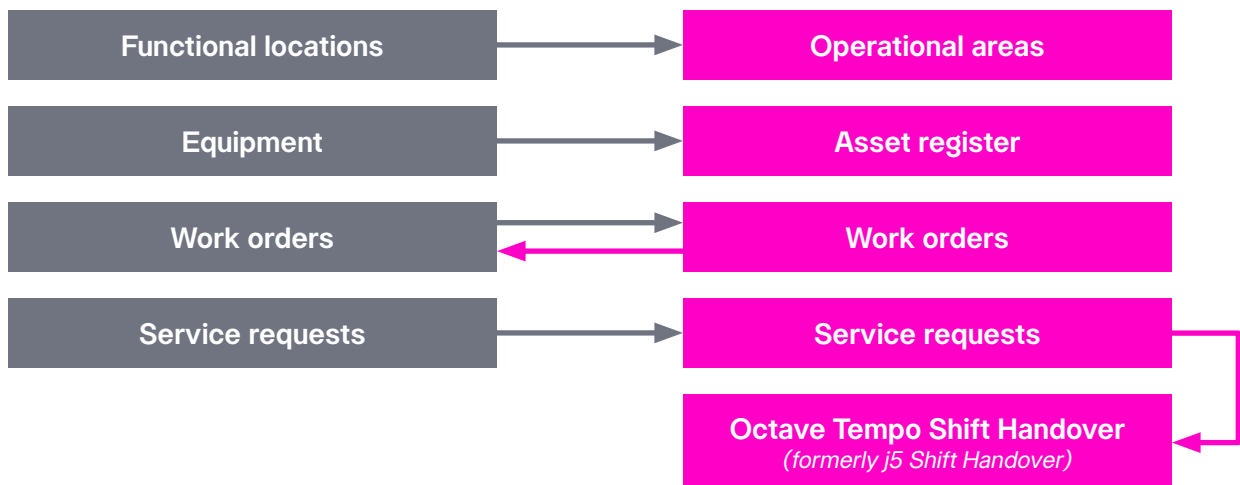

Keep operations and maintenance teams in sync

Industrial sites generate a constant flow of operational, maintenance and safety events. Keeping everyone aligned remains essential to maintaining performance, reliability and safety.

By synchronizing IBM Maximo asset management, work orders and service requests with Tempo Operations Management (formerly j5 Operations Management Solutions), teams can work from the same updated information. Sharing visibility across departments improves coordination, supports more informed decision making and helps teams respond with confidence.

Synchronize the IBM Maximo asset management, work orders and service requests with Tempo Operations Management

"Tempo Operations Management has contributed to the efficient and stable operation of INPEX assets. Information is standardized and accurate."

Jinsen Li, General manager, information management and technology unit, INPEX

Control room

Personnel can view work orders for equipment and operational areas that require maintenance and create service requests. This can be done using the Tempo Operations Management interface.

Field operators

Operators can view work orders in the field, review service requests and create new ones. This is particularly useful when they notice maintenance issues while performing Tempo Operator Rounds and Routine Duties (formerly j5 Operator Rounds and Routine Duties) on their mobile devices.

Maintenance

Maintenance teams, work orders and service requests from the IBM Maximo computerized maintenance management system (CMMS) appear in the same functional locations and equipment categories in Tempo Operations Management, making it easy to use both.

Safety

Shared access to consistent information and aligned processes keeps operations and maintenance teams in sync, reduces risk and helps protect workers and surrounding communities.

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
