

SOLUTION SHEET

Octave Tempo Operations Management connectors

Connect Octave Tempo Operations Management applications with data historians, computerized maintenance management systems (CMMS), distributed control systems (DCS) and engineering data

On every industrial site there is a stream of operations, maintenance and safety events occurring at all levels and areas. Using singular solutions and homegrown applications can lead to siloed information that is not easily shareable. Octave Tempo Operations Management (formerly j5 Operations Management Solutions) enables comprehensive, real-time connections with data historians, CMMS, DCS and engineering data.

Benefits achieved by linking Tempo Operations Management connectors:

- **Consistent stream of data** – Ensure consistency across operations and process safety teams
- **Centralized data repository** – Replace paper, spreadsheets, scattered databases and disconnected applications with a unified platform with enterprise scalability
- **Intuitive data connection** – Configure Tempo Operations Management applications to easily collate all relevant external system information
- **Time saving and accuracy** – Avoid wasting time searching paper files or disconnected systems and bring together information that is relevant and up-to-date

Tempo Operations Management connectors

Tempo Operations Management connector for the Aveva™ PI System™	Combine human procedures with real-time data including PI tags, PI asset framework and PI event frames	Data historian/DCS/PLC/SCADA
Tempo Operations Management connector for Aspen InfoPlus.21® (IP.21)	Enables a connection with the data historian for the retrieval and write back of tag historical values	Data historian/DCS/PLC/SCADA
Tempo Operations Management connector for OPC sources	Link data with an OPC connector such as a DCS	Data historian/DCS/PLC/SCADA
Tempo Operations Management connector for SAP Plant Maintenance (PM)	Synchronize plant information including work orders and work notifications	CMMS/EAM
Tempo Operations Management connector for IBM Maximo®	Retrieve equipment and functional location data and access work orders	CMMS/EAM

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we’ve partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what’s possible from day one onward.
