Mining: Accelerate your journey to operational excellence

Digital transformation solutions from pit to plant to port

Maximize your operations

- Digitalize safety-critical human sensor information from pit to plant to port
- Capture, structure and store critical asset, situational and qualitative information digitally to support interconnected teams across the enterprise
- Supply valuable shift, operator round, control of work, personnel, safety, maintenance and process information to users across your organization with Octave Tempo Operations Management (formerly j5 Operations Management Solutions) and Tempo Operating Procedures (formerly AcceleratorKMS)

Connect operational data

- Unlock siloed data for connected, visible and usable information with Octave InConcert Core (formerly HxGN SDx) to reduce risk and improve safety through data-driven decisions
- Gain deeper insight into the performance of operational layers of protection with the Octave Tempo Control System Effectiveness (formerly PAS PlantState Integrity) platform and address risk before it reaches the point of loss
- Defend your operational technology and industrial control systems (OT/ICS) landscape with Octave Cyber Integrity (formerly PAS Cyber Integrity) platform as part of your cybersecurity strategy
- Modernize asset visibility, productivity and lifecycle management using mobility, visualization and advanced analytics with Octave Attune EAM (formerly HxGN EAM)

Transform your enterprise with smart digital reality

- Establish and maintain an information management data ecosystem across the entire asset lifecycle, enabling a transformative journey toward operational excellence
- Deploy a comprehensive digital twin for analyzing and converting intricate data into actionable insights, seamlessly interacting with other digital twins across the value chain to facilitate the digital backbone
