

Project collaboration

Improve capital project
communication and reclaim
time for what matters most

As projects grow larger, more complex and need to be executed faster, the risk of overruns (i.e., schedule, costs) increases. Additionally, due to size and complexity more parties get involved, and communication often bottlenecks. This is particularly troublesome in an industry where multibillion-dollar projects, involving numerous contractors working globally across various locations, have become more frequent. Even billion-dollar projects are no longer uncommon!

Increasing efficiency of engineering work processes

To address these challenges, Octave combines the capabilities of InConcert Core (formerly HxGN SDx) and Sequence Enterprise (formerly EcoSys) into a unified solution. This ensures stakeholders have access to accurate, up-to-date information for faster, better-informed decisions. Automated workflows and notifications help teams track progress, schedules and budgets efficiently.

Leveraging InConcert Core and Sequence Enterprise

- Ensures enforcement of inter-discipline communication, promoting collaboration
- Establishes workflows involving all internal and external parties for coordinated task completion
- Implements notifications to keep stakeholders informed
- Provides role-based access to protect intellectual property
- Eliminates data-chasing, enhancing resource utilization
- Accelerates turnaround time for data/documents for better, faster decision-making
- Streamlines collaboration by consolidating markups
- Increases efficiency of work/communication, enabling up to a 10% reduction in hours

Make an impact

Break
through
barriers

Enable
your
engineers

Succeed with accountability and visibility into project progress

- Enable role-based actions for increased accountability
- Implement sign-off procedures to track progress
- Define and enforce workflows to maintain consistency
- Manage against budget/schedule with faster access to data/documents
- Leverage discipline-/task-based queries to better understand work packages and impacts

About Octave

Octave is a leader in enterprise software, turning data into decisive action and intelligence into your edge. Our software solves for and simplifies complexity, from the design and build to operations and protection of people, property, and assets— for any scope, at any scale. For decades, we've partnered with customers to sharpen performance, elevate efficiency, and amplify results. From factory floors to entire cities, our solutions are tuned to scale up what's possible from day one onward.
